

# Hello and thank you for purchasing StoryTeller!

Full Version ✨

This is a Wireframe Kit created to efficiently draft websites. It contains more than 100 blocks in 15 categories that can be easily built into a complete wireframe in a few minutes.

Blocks come in these categories:

- heroes
- inromational blocks
- features
- numbers
- cards
- CTAs
- reviews
- video
- pricing
- team
- FAQ
- gallery
- blog
- footer
- partners

StoryTeller has minimum visual complexity and uses no bright colors (only neutrals) — all to keep your wireframes simple and leave room for creativity and exploration when you are ready to proceed to design your visuals.

On top of that StoryTeller offers:

**Pixel perfect designs**

StoryTeller uses a 4px grid at its foundation to introduce more control over the vertical rhythm of each page.

**Neatly organized layers**

Every item has its name and its place which ensures simple navigation.

**Dark mode**

All blocks come in light and dark modes. Global color styles and variants allow you to easily switch any component between each mode.

**Component sets with variants**

All essential components are organized in variants so you can quickly choose between different color modes and states.

**Smart components library**

A library of basic components with auto layout. You can freely combine them and create any design you need: from sign up form to shopping cart.

Soon!

**Mobile layouts**

Currently, StoryTeller blocks come in desktop resolution only, but mobile layouts going to be there soon. Buy now and get the update for free!

By the way, this page was fully created with StoryTeller components and styles...

Let’s see what else you can build!
