

This is Intelligent Health

Valo is a technology company that is transforming the drug discovery and development process and accelerating the creation of life-changing drugs on behalf of patients.

[Learn about our company](#) →

Valo envisions a world where every disease has a treatment through the transformation of the drug development process.

Valo has pioneered a new approach to target discovery and drug development – one that is based on high-quality, high-density data with scalable computational capabilities, all built on a single integrated architecture.

Valo was created with the strong belief that the drug development process can and should be better.
