## Unlock more interactivity

In Framer, interactions are first-class throughout your whole workflow—wireframing, visual design, prototyping, design systems, handoff, and user testing. Create prototypes in the canvas with animations, transitions, and Smart Components and get better feedback from user tests, useful handoff code for engineers, and quicker buy-in from stakeholders.

## New features

←

→

**Smart Components**

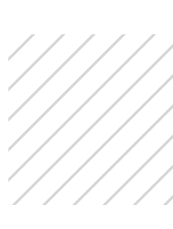

Introducing Smart Components—interactive components that have their own interactions, animations, and properties. And require no code to build.

## Collaboration as a loop, not a cycle

Learn why you should switch your team to Framer →

Asynchronous collaboration in your design tool is great, but what's the point if it just means more back-and-forth? Framer helps you rethink collaboration, offering deeper ways for designers to work in teams and plug into existing workflows used by copywriters, UX researchers, and developers.

 **Tyce Clee**  
Spotify, Senior Web Engineer

**The future of design systems combines both code and design into the same place—a single source of truth for both design tokens and components.**
